²Faculty of pharmacy, University of Montreal, Montreal,

Objectives

- To compare the required training for hospital pharmacy practice in France and in Quebec during a one-year internship in a Quebec teaching hospital
- To explore the similitudes and differences in trainings

Methods

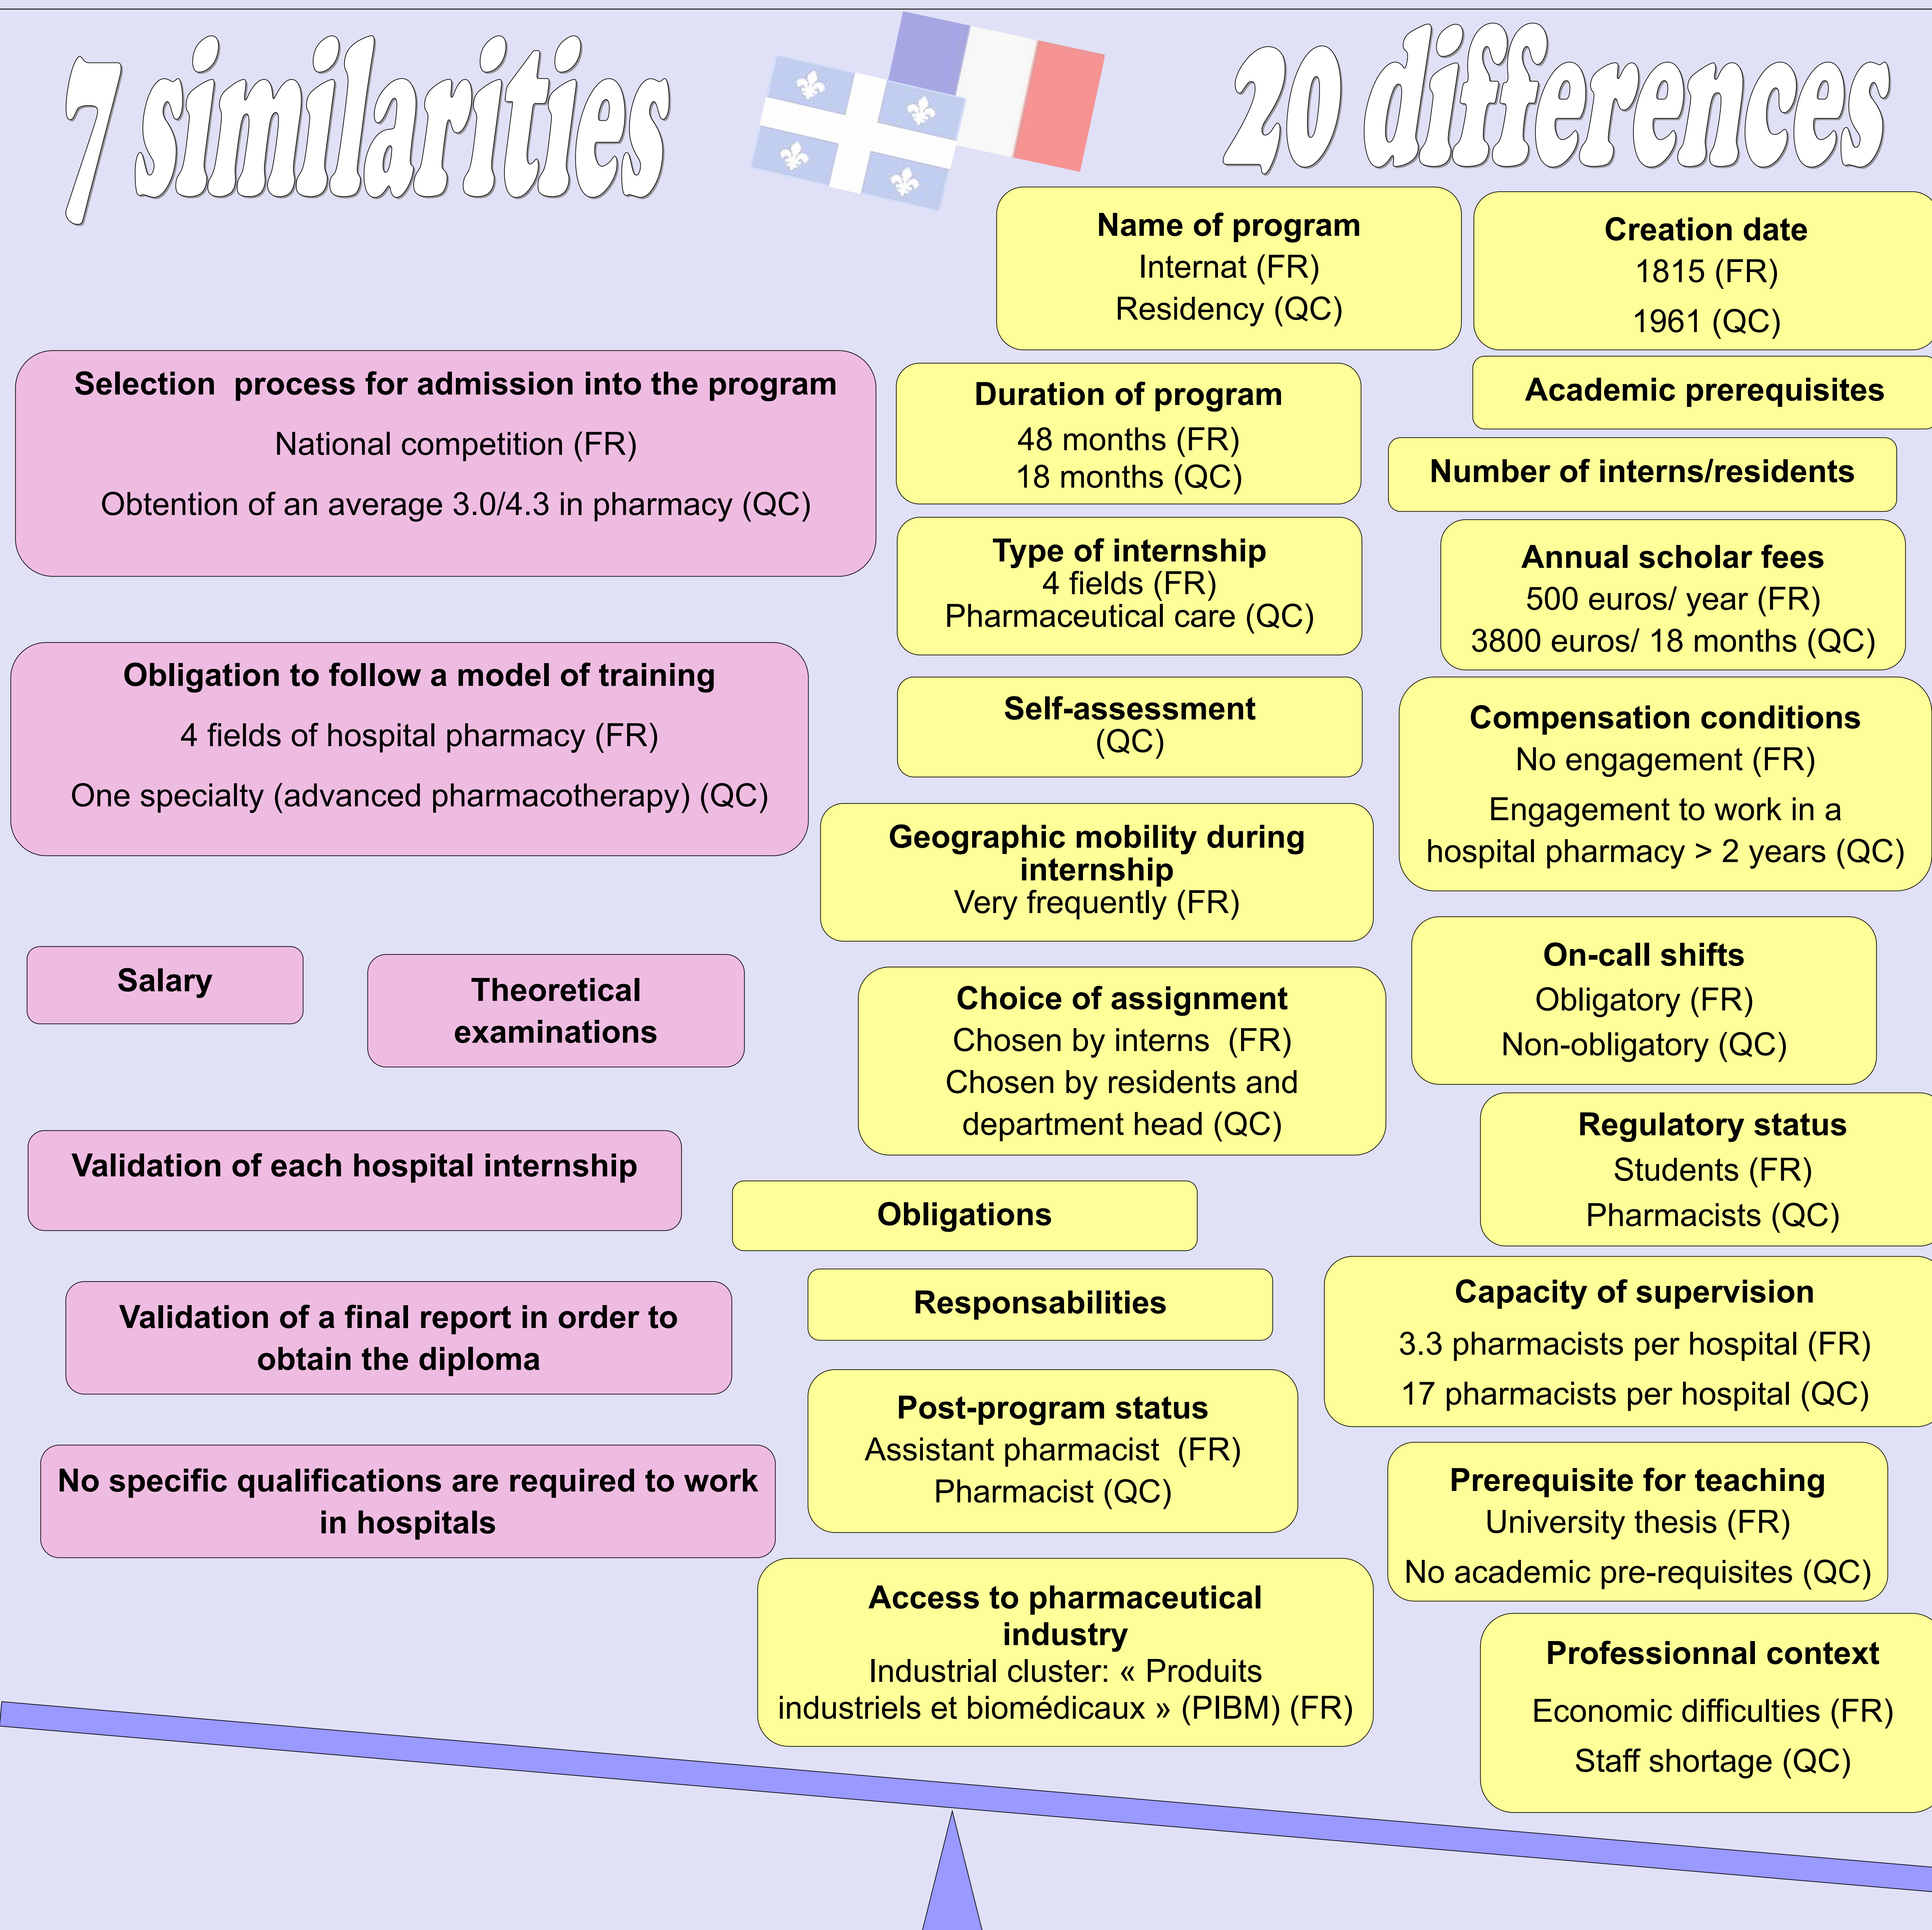

- Descriptive, comparative study
- Three French interns, one Quebec resident, two Quebec hospital pharmacists affiliated with the Faculty of pharmacy
- After review of key websites and literature, a list of relevant themes was established

Results - Discussion

7 similarities

20 differences

Conclusion

- Significant differences between French and Quebec post-graduate training required to work in a hospital setting
- A better understanding of these similitudes and differences may contribute to reciprocal improvement of these programs and favour exchanges between both countries
